CATALOG DESCRIPTION: Introduces the basic concepts and theoretical principles of modern chemistry. Emphasis on stoichiometry, atomic theory, properties of matter, periodic table, chemical bonding, kinetic-molecular theory, states of matter, gas laws, solutions, oxidation-reduction, and acid base systems. Recommended for science majors.

PREREQUISITE(S): CHE 110-Intro to Chemistry
ENG042 - Critical Reading or appropriate placement score
Mat 051-Introductory Algebra or appropriate placement score

COREQUISITE(S): None

CREDITS: 4 HOURS: 3 hours lecture and 3 hours lab

ISBN: 978-1-133-61066-3

Gallett, Custom General Chemistry 2 (2007)

ISBN: 978-0495645764

SUPPLEMENTAL MATERIALS: Calculator with basic scientific functions.

NO cell phones, Blackberries, or other electronics will be allowed for exams or quizzes.

Safety Glasses (REQUIRED), Lab coat/apron

INSTRUCTOR INFORMATION:

OFFICE HOURS:
CORE COMPETENCIES: The following core competencies are embedded in this curriculum: Communicate effectively in both speech and writing; Apply appropriate mathematical and statistical concepts and operations to interpret data to solve problems; Use scientific method of inquiry, through the acquisition of scientific knowledge; Use computer systems or other appropriate forms of technology to achieve educational and personal goals; Address an information need by locating, evaluating and effectively using information

<tr>
<th>LEARNING ASSESSMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Student Learning Outcomes:</strong></td>
</tr>
<tr>
<td>Apply problem-solving and critical thinking to solve chemical problems, perform calculations, and conversions</td>
</tr>
<tr>
<td>Use the periodic table to determine atomic structure of the elements, classify the elements, and compare the physical and chemical properties of the elements</td>
</tr>
<tr>
<td>Differentiate between the characteristics and properties of the different states of matter</td>
</tr>
<tr>
<td>Identify, categorize, and analyze the different types of chemical reactions and perform related calculations and conversions</td>
</tr>
<tr>
<td>Use covalent and molecular orbital theories to determine the structures, chemical nature, and geometries of inorganic and organic compounds</td>
</tr>
<tr>
<td>Demonstrate effective oral and written communication skills</td>
</tr>
<tr>
<td>Conduct basic research and literature searches through the use of the library, internet, and other resources</td>
</tr>
<tr>
<td>Use the scientific method to conduct laboratory experiments</td>
</tr>
</tbody>
</table>

**DISABILITY SERVICES STATEMENT:** Warren County Community College is committed to providing all students equal access to learning opportunities. Student Services is the campus office that works with students who have disabilities to provide and/or arrange reasonable
accommodations. Students who have, or think they may have, a disability (e.g. mental health, learning, vision, hearing, physical or systemic), are invited to contact Student Services to arrange a confidential discussion at (908) 835-2300 or by email at StudentServices@Warren.edu as soon as possible. Students registered for Disability Services with Student Services, who have requested accommodations for the current semester will be provided with an electronic letter detailing individual accommodations and are encouraged to contact the instructor early in the semester to discuss accommodations outlined in their letter.

INSTRUCTIONAL SUPPORT CENTER: The Instructional Support Center (ISC), located in Room 105 across from the library, provides academic support at no cost to WCCC students and is available for courses in which they are currently enrolled. The ISC is staffed with trained professional and peer tutors who are ready to help you understand and succeed. For scheduling or further information, visit the ISC in person, online at http://www.warren.edu/tutoring/ or by telephone at (908)835-2354.

STATEMENT AND POLICY ON CHEATING, PLAGIARISM AND ACADEMIC DISHONESTY: Students are required to perform all the work specified by the instructor, and are responsible for the content and integrity of all academic work submitted. A violation of academic integrity will occur if a student: (1) knowingly represents work of others as one’s own, (2) uses or obtains unauthorized assistance in any academic work, (3) gives fraudulent assistance to another student, or (4) furnishes false information or other misuse of college documents.

In cases of suspected violation of academic integrity, the incident is to be reported to the Office of Academics. A student found guilty of violating the rule of academic integrity by the Vice President of Academics will be considered to have failed in personal obligation to the College; such failure will be subject to disciplinary action by the College. Unless otherwise notified, the instructor will allow students who are pending disciplinary action to attend class.

REQUIRED FORMAT FOR RESEARCH PAPERS: Research papers written for any Warren County Community College class must conform to the required documentation style. Papers written for humanities (and some social science) classes will follow the most recent edition of the Modern Language Association (MLA) in-text citation and bibliographic methods. Social science and science papers will require the use of the most recent edition of the American Psychological Association (APA) in-text citation and bibliographic methods.

Please consult with your instructor regarding the correct documentation style to use in his/her class.

ATTENDANCE POLICY: Students are expected to attend all class sessions of courses in which they are enrolled and are responsible for all material presented in class and all homework assignments.

Grades are based on the quality of work completed in meeting the requirements for a particular course, as stated in the course syllabus and catalog description.
Excessive absence may be considered sufficient cause for dismissal from class by an instructor or other appropriate college staff member. Any decision to exclude a student from class or the College due to excessive absence shall be subject to review by the President in accordance with established procedures. Students who have not attended class are not entitled to a refund of tuition.

WCCC HAYTAIAN & MAIER LIBRARY: (908) 835-2336 http://warren.libguides.com

Library Hours
Monday-Thursday 8am-8pm
Friday 8am-3pm

Check the Academic Calendar for specific holiday dates. Exceptions may apply during breaks and summer sessions. Any changes to the Library’s hours are posted on the Library’s web page and near the Library doors.

- **Passwords and Log-Ins**-The Library is responsible for resetting passwords for your Network account (email, computers, Wi-Fi, library resources, and printing). This cannot be reset over the phone. Please stop by the Library for help.
- **College IDs**-College IDs are required for all students. The Library is responsible for producing all ID cards. To get an ID card you must bring to the Library a current copy of your class schedule and another form of ID. Your student ID is also your library card and is needed to check materials out of the Library. Your first ID card is free and replacement cards are issued at a cost to the student.
- **Inter-Library Loan (ILL)**-The Library participates in a nation-wide inter-library loan program which is available free to all students and faculty. You can either submit ILL requests via the Internet (form available on the Library’s web page) or in person at the circulation desk.

### TOPICAL OUTLINE:

- Matter and energy, states of matter, chemical and physical properties, elements, compounds, mixtures, units of measurement.
- Conversions, factor-label method, percent composition, heat and temperature.
- Introduction to the periodic table. Elements, atoms, molecules, compounds, and classification of chemical and physical properties of the elements and compounds.
- Identification, classification, and balancing of chemical reactions/equations. Limiting reactant and predicting yield.
- The structure of atoms, history of atomic theory, mass number and isotopes, atomic orbitals, quantum theory, electron configuration.
- Chemical periodicity, atomic radii, periodic table trends, electronegativity, electron affinity.
- Chemical bonding, covalent bonds, Lewis structures, Octet Rule, resonance, and dipole moments.
- Molecular structure and covalent bonding theories, molecular shapes and bonding, molecular orbitals (MO) theory in chemical bonding,
- Reactions in aqueous solutions, acids, bases, salts, and related calculations, pH, buffers.
