

CERTIFICATE IN DRONE PILOT

All courses may be applied to the Associate in Applied Science in Unmanned Aerial Systems (Drones)

The Certificate in Drone Pilot program is designed to train students to become a commercial drone pilot. Upon completion of the program, students will be prepared to both pass the FAA Aeronautical Knowledge Test for a Remote Pilot Certificate and gain the knowledge needed to excel in high traffic airways. Students will be educated as pilots and technicians to operate small unmanned aerial vehicles (sUAS (drones) .55 lbs to less than 55lbs). At a minimum, students will train on simulation software, and at the WCCC “Droneport” on DJI’s Phantom 3 SE, Phantom 4 Pro, Mavic Pro, Inspire as well as Yuneec Typhoon 4 Pro and Yuneec Tornado.

Components of the program include: the Mechanics of Unmanned Systems; Principles of Flight; Private Pilot Theory; Advanced Unmanned Aerial Systems Operations; Payloads and Sensors; Aviation Safety Management Systems; Air Traffic Control Systems. Students are instructed in the theory, functions, and regulations regarding small unmanned aerial systems.
