

Course Master Syllabus

CATALOG DESCRIPTION: This course prepares students to enter the remote sensing industry with comprehensive fluency in how the industry operates, which technologies are important for creating value, and the past and future development of the remote sensing and geospatial market ecosystem. Students will learn to analyze the key elements of the entire value chain, and develop strategies to create the greatest value for their customers. The course provides practical training on aerial IR inspections and applications. Topics covered include infrared science, a solid basis in a wide variety of popular applications, sUAS safety, and how to select the proper camera and lens combination for mission needs. The course will concentrate on remote sensing applications for precision agriculture and commercial space operations as well.

Course Master Syllabus

CORE COMPETENCIES: The following core competencies are embedded in this curriculum: Communicate effectively in both speech and writing; Apply appropriate mathematical and statistical concepts and operations to interpret data to solve problems; Use computer systems or other appropriate forms of technology to achieve educational and personal goals; Address an information need by locating, evaluating and effectively using information.

LEARNING ASSESSMENT				
Student Learning Outcomes:	Suggested Means of Assessment:			
Explain the evolution of the satellite remote	Reaction Paper			
sensing industry from government programs				
in the 1960s to increasing level of				
commercially supported programs today.				
Apply thermography theory, science and	Research Project			
techniques, including interpretation of				
radiometric survey results specific to aerial				
applications.				
Plan flight altitude and range-to-target to	Research Project			
acquire accurate thermal information about a				
target of interest.				
Use sUAS IR solutions and specifications to	Research Project			
make informed decisions regarding the				
appropriate IR camera payloads for specific				
mission parameters.				
Utilize post processing software for image	Research Project			
analysis, report generation, and video editing.				
GRADING SYSTEM:	C+ = 77 < 80			
A = 90 < 100	C = 70 < 77			
B+ = 87 < 90	D = 60<70			
B = 80 < 87	F = Below 60			

DISABILITY SERVICES STATEMENT: Warren County Community College is committed to providing all students equal access to learning opportunities. Student Services is the campus office that works with students who have disabilities to provide and/or arrange reasonable accommodations. Students who have, or think they may have, a disability (e.g. mental health, learning, vision, hearing, physical or systemic), are invited to contact Student Services to arrange a confidential discussion at (908) 835-2300 or by email at StudentServices@warren.edu as soon as possible. Students registered for Disability Services with Student Services, who have requested accommodations for the current semester will be provided with an electronic letter detailing individual accommodations and are encouraged to contact the instructor early in the semester to discuss accommodations outlined in their letter.

Course Master Syllabus

INSTRUCTIONAL SUPPORT CENTER: The Instructional Support Center (ISC), located in Room 105 across from the library, provides academic support at no cost to WCCC students and is available for courses in which they are currently enrolled. The ISC is staffed with trained professional and peer tutors who are ready to help you understand and succeed. For scheduling or further information, visit the ISC in person, online at http://www.warren.edu/tutoring/ or by telephone at (908)835-2354.

STATEMENT AND POLICY ON CHEATING, PLAGIARISM AND ACADEMIC

DISHONESTY: Students are required to perform all the work specified by the instructor and are responsible for the content and integrity of all academic work submitted. A violation of academic integrity will occur if a student: (1) knowingly represents work of others as one's own, (2) uses or obtains unauthorized assistance in any academic work, (3) gives fraudulent assistance to another student, or (4) furnishes false information or other misuse of college documents.

In cases of suspected violation of academic integrity, the incident is to be reported to the Office of Academics. A student found guilty of violating the rule of academic integrity by the Vice President of Academics will be considered to have failed in personal obligation to the College; such failure will be subject to disciplinary action by the College. Unless otherwise notified, the instructor will allow students who are pending disciplinary action to attend class.

REQUIRED FORMAT FOR RESEARCH PAPERS: Research papers written for any Warren County Community College class must conform to the required documentation style. Papers written for humanities (and some social science) classes will follow the most recent edition of the Modern Language Association (MLA) in-text citation and bibliographic methods. Social science and science papers will require the use of the most recent edition of the American Psychological Association (APA) in-text citation and bibliographic methods.

Please consult with your instructor regarding the correct documentation style to use in his/her class.

ATTENDANCE POLICY: Students are expected to attend all class sessions of courses in which they are enrolled and are responsible for all material presented in class and all homework assignments.

Grades are based on the quality of work completed in meeting the requirements for a particular course, as stated in the course syllabus and catalog description.

Excessive absence may be considered sufficient cause for dismissal from class by an instructor or other appropriate college staff member. Any decision to exclude a student from class or the College due to excessive absence shall be subject to review by the President in accordance with established procedures. Students who have not attended class are not entitled to a refund of tuition.

WCCC HAYTAIAN & MAIER LIBRARY

Text: 908-652-4445 Email: lstoll@warren.edu

http://warren.libguides.com

Please see the library's website above for current semester hours.

The WCCC Library offers a wide range of services to students specific to the information literacy goals of the College which includes suggesting research strategies, facilitating the use of both digital and print resources, as well as assisting students with citations to avoid plagiarism.

The library also serves as the College's computer space, with computers for students to use when the library is open. Students also have free, unlimited printing from the College's computers, as well as space to study.

The library is where students can get their college student ID cards. All students are required to get a student ID card and carry it while on campus for security purposes. To get a student ID card, you must bring another form of ID to the library. You may also be asked to bring a printed copy of your current class schedule. You can get a student ID card any time that the library is open. These cards do not expire and can be used for your duration at WCCC.

Additionally, the library participates in a national inter-library loan program which is available free to all students and faculty. You can submit ILL requests by emailing the librarian or by stopping by the library's circulation desk.

TOPICAL OUTLINE:

- 1. Space remote sensing introduction: basic physical principles, concepts, and systems
- 2. Variety of common payloads and how these tie into the spectrum, including:
 - a. Electro-Optical (EO)
 - b. Near-Infrared (NIR)
 - c. Multi/Hyperspectral (MSI/HSI)
 - d. Light Detection and Ranging (LiDAR)
 - e. Lenses, physics of light, and cameras in context of remote sensing
 - f. Other photography concepts, such as International Organization of Standards (ISO) for film speed, shutters, exposure time etc.
- 3. Satellite photography including LANDSAT
- 4. Multispectral remote sensing from space including infrared
- 5. RADAR and LIDAR sensing from space
 - a. Conducting a LIDAR mission from an sUAS
 - b. Compare and contrast satellite & drone imagery
- 6. Digital image processing of data from space-based sensors
- 7. Geographic and environmental space sensing applications

Course Master Syllabus

- 8. Renewable and non-renewable resources space sensing applications
- 9. Land use and natural hazards space sensing applications
- 10. Climate change and archaeology space sensing applications
- 11. THERMAL
- 12. Examples of applications
 - a. Precision agriculture
 - b. UAS applications
