CHE 165 General Chemistry II

Course Master Syllabus

Catalog Description: As a continuation of CHE 164 – General Chemistry I, the topics explored in this course include gas laws, solutions, oxidation-reduction, acid-base systems, chemical equilibrium, kinetics, thermodynamics, electrochemistry, radiochemistry, and an introduction to organic chemistry. This course is recommended for science majors.

Prerequisite(s): CHE 164 -- General Chemistry

Corequisite(s): MAT 131 -- College Algebra; ENG 140 -- English Comp I

Credits: 4

Hours: 3 lecture 3 lab

Required Text(s): OWLv2 with QuickPrep for Whitten/Davis/Peck/Stanley's Chemistry, 10th edition

Supplemental Materials: Custom labs prepared by WCCC Chemistry Department

Instructor Information:

Office Hours:

Program Goals:

1. Apply the scientific method in experimentation and data analysis.
2. Analyze complex scientific problems, perform calculations, and evaluate solutions.
3. Communicate scientific information clearly through both oral and written communication.
4. Critically analyze problems through gathering data from multiple sources and apply findings to new scenarios.
5. Describe fundamental biological, chemical, and physical principles, including, but not limited to, molecular and cellular functions, anatomy and physiological function, inheritance, and both organic and inorganic chemical reactions.
6. Interpret results from experimentation that utilizes modern laboratory techniques and instrumentation.

CORE COMPETENCIES: The following core competencies are embedded in this curriculum: Communicate effectively in both speech and writing; Apply appropriate mathematical and statistical concepts and operations to interpret data to solve problems; Use scientific method of inquiry, through the acquisition of scientific knowledge; Use computer systems or other appropriate forms of technology to achieve educational and personal goals; Address an information need by locating, evaluating and effectively using information	
LEARNING ASSESSMENT	
Student Learning Outcomes:	***Suggested Means of Assessment:***
Apply problem-solving and critical thinking to solve chemical problems, perform calculations and conversions related to solutions, redox reactions, gas laws, crystals, thermodynamics, kinetics, equilibrium, solubility product constant, acids, bases, buffers, nuclear chemistry, and electrochemistry	Exams, quizzes, homework, hands-on laboratory activities, and laboratory reports
Demonstrate effective oral and written communication skills	Homework, hands-on laboratory activities, and laboratory reports
Conduct basic research and literature searches through the use of the library, internet, and other resources	Homework, and laboratory reports
Use the scientific method to conduct laboratory experiments	Hands-on laboratory activities, and laboratory reports
GRADING SYSTEM:	C+ = 77 < 80
A = 90 < 100	C = 70 < 77
B+ = 87 < 90	D = 60< 70
B = 80 < 87	F = Below 60

Statement and Policy on Cheating, Plagiarism, and Academic Conduct

https://www.warren.edu/wp-content/uploads/2025/01/Policy-304-304.3-Student-Rights-Responsibilites-and-Academic-Conduct.pdf

Students are required to perform all the work specified by the instructor and are responsible for the content and integrity of all academic work submitted. A violation of academic integrity will occur if a student: (1) knowingly represents work of others as one's own, (2) uses or obtains unauthorized assistance in any academic work, (3) gives fraudulent assistance to another student, or (4) furnishes false information or other misuse of college documents.

Unauthorized use of Artificial Intelligence (AI) is prohibited unless the instructor explicitly permits it in the syllabus or assignments. If tools such as ChatGPT are permitted by an instructor to be used for an assignment, they should be used with caution and with proper citation. In all such cases, you may only use the specific tools identified as acceptable and you must adhere to the College's standards for attribution, validation, and transparency.

In cases of suspected violation of academic integrity, the incident is to be reported to the Office of Academics. A student found guilty of violating the rule of academic integrity by the Vice President of Academics will be considered to have failed in personal obligation to the College; such failure will be subject to disciplinary action by the College. Unless otherwise notified, the instructor will allow students who are pending disciplinary action to attend class.

Tutoring and Testing at the Instructional Support Center (ISC)

Citation Styles and Formatting

Work submitted for any Warren County Community College course must conform to the required formatting and citation style that are specified by the instructor. The Library and Instructional Support Center can assist students with formatting and citations for assignments and papers.

WCCC Attendance Expectations

The College expects students to attend and participate in all classes. This involves sharing discussions and lectures in class, as well as interacting with other students. Grades are based on the quality of work students complete in meeting the requirements for a particular course, as stated in the course syllabus and catalog description. Attendance, among other factors, may be an additional criterion for assigning grades. Students should realize that they are responsible for all class meetings and that work missed because of absences may affect their grades. Attendance in online classes is determined by the completion of assignments/ tests. Students who have not completed any assignments or tests will be considered non-attending and receive an NF grade in online classes.
