Warren County Community College

MAT 150 Elements of Statistics

Course Master Syllabus

Course Information

Catalog Description: This course is designed to give students a basic overview of what statistics are and how they are used. Students will study the vocabulary of statistics and then focus on calculating and interpreting statistics. This course will prepare students to use statistics that they will encounter in their lives. Study will include sampling; experiments and observational studies; summarizing and displaying data; bell-shaped curves; plots, graphs, and pictures; relationships between variables; reporting trends; probability; confidence intervals; hypothesis testing; and case studies.

Prerequisite(s): None

Corequisite(s): None

Credits: 3

Hours: 3

Required Text(s):

Supplemental Materials:

Program Goals

1. Apply mathematical and statistical concepts to solve a variety of problems, including those in science, business, and engineering.
2. Analyze and interpret quantitative data and communicate findings through verbal, numerical, and graphical models.
3. Clearly communicate mathematical concepts and solutions both verbally and in writing.

4. Use technological tools, such as graphing calculators or computers, to assist in solving mathematical and applied problems.
5. Develop the ability to understand and apply mathematical reasoning in diverse contexts, both within academia and in real-life situations.
6. Demonstrate an understanding of logical arguments and applying mathematical reasoning to draw conclusions.

Class Core Competencies

The following core competencies are embedded in this curriculum:

- Communicate effectively in both speech and writing.
- Apply appropriate mathematical and statistical concepts and operations to interpret data to solve problems.
- Use computer systems or other appropriate forms of technology to achieve educational and personal goals.

Class Learning Assessment

Student Learning Outcomes	Suggested Means of Assessment
Communicate accurate mathematical terminology and notation to explain strategies to solve problems and interpret solutions.	Homework, projects, tests, final exam
Use technology correctly to solve mathematical problems.	Homework, projects, tests, final exam
Utilize various reasoning, problem-solving, and critical thinking techniques to interpret research.	Homework, projects, tests, final exam
Compute measures of descriptive statistics.	Homework, projects, tests, final exam
Apply basic statistical concepts.	Homework, projects, tests, final exam

Grading System

Letter Grade	Percentage Range
A	90 to 100 percent
B Plus (B+)	87 to 89.9 percent
B	80 to 86.9 percent
C Plus (C+)	77 to 79.9 percent
C	70 to 76.9 percent
D	60 to 69.9 percent
F	Below 60 percent

Statement and Policy on Cheating, Plagiarism, and Academic Conduct
Academic Conduct Policy (Policy 304) [PDF]

Students are required to perform all the work specified by the instructor and are responsible for the content and integrity of all academic work submitted. A violation of academic integrity will occur if a student: (1) knowingly represents work of others as one's own, (2) uses or obtains unauthorized assistance in any academic work, (3) gives fraudulent assistance to another student, or (4) furnishes false information or other misuse of college documents.

Unauthorized use of Artificial Intelligence (AI) is prohibited unless the instructor explicitly permits it in the syllabus or assignments. If tools such as ChatGPT are permitted by an instructor to be used for an assignment, they should be used with caution and with proper citation. In all such cases, you may only use the specific tools identified as acceptable and you must adhere to the College's standards for attribution, validation, and transparency.

In cases of suspected violation of academic integrity, the incident is to be reported to the Office of Academics. A student found guilty of violating the rule of academic integrity by the Vice President of Academics will be considered to have failed in personal obligation to the College; such failure will be subject to disciplinary action by the College. Unless otherwise notified, the instructor will allow students who are pending disciplinary action to attend class.

Citation Styles and Formatting

Work submitted for any Warren County Community College course must conform to the required formatting and citation style that are specified by the instructor. The Library and Instructional Support Center can assist students with formatting and citations for assignments and papers.

WCCC Attendance Expectations

The College expects students to attend and participate in all classes. This involves sharing discussions and lectures in class, as well as interacting with other students. Grades are based on the quality of work students complete in meeting the requirements for a particular course, as stated in the course syllabus and catalog description. Attendance, among other factors, may be an additional criterion for assigning grades. Students should realize that they are responsible for all class meetings and that work missed because of absences may affect their grades. Attendance in online classes is determined by the completion of assignments/ tests. Students who have not completed any assignments or tests will be considered non-attending and receive an NF grade in online classes.

Class Attendance Expectations

Topical Outline

1. The Role of Statistics and the Data Analysis Process
2. Collecting Data Sensibly
3. Graphical Methods for Describing Data
4. Numerical Methods for Describing Data
5. Summarizing Bivariate Data
6. Probability
7. Random Variables and Probability Distributions
8. Sampling Variability and Sampling Distributions
9. Estimation Using a Single Sample
10. Hypothesis Testing Using a Single Sample

11. The Analysis of Categorial Data and Goodness-of-Fit Tests
