Warren County Community College

MAT 202 Calculus II
Course Master Syllabus

Course Information

Catalog Description: This course continues the study of MAT 201 – Calculus I with Analytic Geometry. Study will include applications of integration, techniques of integration, improper integrals, infinite series and sequences, Conic sections, parametric equations, and polar coordinates. The use of advanced scientific graphing calculators (TI-89) is required.

Prerequisite(s): MAT 201 – Calculus I with a grade of C or HIGHER

Corequisite(s): None

Credits: 4

Hours: 4

Required Text(s): WebAssign for Larson/Edwards' Calculus, Multi-Term, 11th ed.

Supplemental Materials: Graphing Calculator (TI-89)

Program Goals

1. Apply mathematical and statistical concepts to solve a variety of problems, including those in science, business, and engineering.
2. Analyze and interpret quantitative data and communicate findings through verbal, numerical, and graphical models.
3. Clearly communicate mathematical concepts and solutions both verbally and in writing.
4. Use technological tools, such as graphing calculators or computers, to assist in solving mathematical and applied problems.

5. Develop the ability to understand and apply mathematical reasoning in diverse contexts, both within academia and in real-life situations.
6. Demonstrate an understanding of logical arguments and applying mathematical reasoning to draw conclusions.

Class Core Competencies

The following core competencies are embedded in this curriculum:

- Communicate effectively in both speech and writing.
- Apply appropriate mathematical and statistical concepts and operations to interpret data to solve problems.
- Use computer systems or other appropriate forms of technology to achieve educational and personal goals.

Class Learning Assessment

Student Learning Outcomes	Suggested Means of Assessment
Apply concepts from Calculus I to solve 2-D and 3-D problems involving area, volume, and work	Homework, quizzes, tests, final exam
Utilize a variety of integration techniques to solve problems	Homework, quizzes, tests, final exam
Calculate sum of convergent infinite series	Homework, quizzes, tests, final exam
Apply concepts of infinite series to estimate and/or compare functions	Homework, quizzes, tests, final exam
Utilize a graphing calculator effectively as a tool to explore and solve complex mathematical problems	Homework, quizzes, tests, final exam
Demonstrate comprehension of the topics covered in this course	Homework, quizzes, tests, final exam

Grading System

Letter Grade	Percentage Range
A	90 to 100 percent
B Plus (B+)	87 to 89.9 percent
B	80 to 86.9 percent
C Plus (C+)	77 to 79.9 percent
C	70 to 76.9 percent
D	60 to 69.9 percent
F	Below 60 percent

Statement and Policy on Cheating, Plagiarism, and Academic Conduct
Academic Conduct Policy (Policy 304) [PDF]

Students are required to perform all the work specified by the instructor and are responsible for the content and integrity of all academic work submitted. A violation of academic integrity will occur if a student: (1) knowingly represents work of others as one's own, (2) uses or obtains unauthorized assistance in any academic work, (3) gives fraudulent assistance to another student, or (4) furnishes false information or other misuse of college documents.

Unauthorized use of Artificial Intelligence (AI) is prohibited unless the instructor explicitly permits it in the syllabus or assignments. If tools such as ChatGPT are permitted by an instructor to be used for an assignment, they should be used with caution and with proper citation. In all such cases, you may only use the specific tools identified as acceptable and you must adhere to the College's standards for attribution, validation, and transparency.

In cases of suspected violation of academic integrity, the incident is to be reported to the Office of Academics. A student found guilty of violating the rule of academic integrity by the Vice President of Academics will be considered to have failed in personal obligation to the College; such failure will be subject to disciplinary action by the College. Unless otherwise notified, the instructor will allow students who are pending disciplinary action to attend class.

Citation Styles and Formatting

Work submitted for any Warren County Community College course must conform to the required formatting and citation style that are specified by the instructor. The Library and Instructional Support Center can assist students with formatting and citations for assignments and papers.

WCCC Attendance Expectations

The College expects students to attend and participate in all classes. This involves sharing discussions and lectures in class, as well as interacting with other students. Grades are based on the quality of work students complete in meeting the requirements for a particular course, as stated in the course syllabus and catalog description. Attendance, among other factors, may be an additional criterion for assigning grades. Students should realize that they are responsible for all class meetings and that work missed because of absences may affect their grades. Attendance in online classes is determined by the completion of assignments/ tests. Students who have not completed any assignments or tests will be considered non-attending and receive an NF grade in online classes.

Class Attendance Expectations

Topical Outline

A. APPLICATIONS OF INTEGRATION

1. Area of a region between two curves
2. Volume: The Disc Method
3. Volume: The Shell Method
4. Arc length and surfaces of revolution
5. Work
6. Moments, centers of mass, and centroids
7. Fluid pressure and fluid force

B. INTEGRATION TECHNIQUES, L'HOPITAL'S RULE, AND IMPROPER INTEGRALS

1. Basic integration rules
2. Integration by parts
3. Trigonometric integrals
4. Trigonometric substitution
5. Partial fractions
6. Integration by tables and other integration techniques
7. Indeterminant forms and L'Hopital's Rule
8. Improper integrals

C. INFINTE SERIES

1. Sequences
2. Series and convergence
3. The Integral Test and p-Series
4. Comparison of series
5. Alternating series
6. Ratio and root tests
7. Taylor polynomials and approximations
8. Power series
9. Representation of functions by power series
10. Taylor and Maclaurin Series

D. CONICS, PARAMETRIC EQUATIONS, AND POLAR COORDINATES

1. Conics and calculus
2. Plane curves and parametric equations
3. Parametric equations and calculus
4. Polar coordinates and polar graphs
5. Area and arc length in polar coordinates
6. Polar equations of conics and Kepler's Laws
