Warren County Community College

PHY 111 College Physics I
Course Master Syllabus

Course Information

Catalog Description: This is the first semester of a two-semester applied science physics course covering Newton's laws, vectors, particle kinematics, dynamics, gas laws, the conservation of energy, fluid mechanics, and thermodynamics.

Prerequisite(s): MAT 131 – College Algebra

Corequisite(s): ENG 140 – English Composition I
MAT 201 – Calculus I

Credits: 4

Hours: 3 lecture 3 lab

Required Text(s):

Supplemental Materials:

Program Goals

- Apply the scientific method in experimentation and data analysis.
- Analyze complex scientific problems, perform calculations, and evaluate solutions.
- Communicate scientific information clearly through both oral and written communication.
- Critically analyze problems through gathering data from multiple sources and apply findings to new scenarios.

- Describe fundamental biological, chemical, and physical principles, including, but not limited to, molecular and cellular functions, anatomy and physiological function, inheritance, and both organic and inorganic chemical reactions.
- Interpret results from experimentation that utilizes modern laboratory techniques and instrumentation.

Class Core Competencies

The following core competencies are embedded in this curriculum:

- Communicate effectively in both speech and writing.
- Apply appropriate mathematical and statistical concepts and operations to interpret data to solve problems.
- Use scientific method of inquiry, through the acquisition of scientific knowledge.
- Use computer systems or other appropriate forms of technology to achieve educational and personal goals.
- Understand ethical issues and situations.
- Address an information need by locating, evaluating, and effectively using information.

Class Learning Assessment

Student Learning Outcomes	Suggested Means of Assessment
Review and extend mathematical concepts applicable to the solution of physics problems and apply the equations to solve problems and predict the outcomes in one and two dimensions	Exams, quizzes, homework, hands-on laboratory activities, and laboratory reports
Develop an understanding of Newton's Three Laws of Motion and apply the laws to state and dynamic physical problems	Exams, quizzes, homework, hands-on laboratory activities, and laboratory reports
Define in terms of physics the everyday expressions of work, energy, and power and develop their interrelationships including the law of conservation of energy, gas laws, and laws of thermodynamics	Exams, quizzes, homework, hands-on laboratory activities, and laboratory reports

Student Learning Outcomes	Suggested Means of Assessment
Apply Newton's Law of Universal Gravitation and Kepler's Three Laws of Planetary Motion to spherical objects, circular motion, and general orbits	Exams, quizzes, homework, hands-on laboratory activities, and laboratory reports
Describe the properties of fluids and solve problems using Archimedes Principle and the Bernoulli Equation	Exams, quizzes, homework, hands-on laboratory activities, and laboratory reports
Demonstrate effective oral and written communication skills	Homework, hands-on laboratory activities, and laboratory reports
Conduct basic research and literature searches through the use of the library, internet, and other technology resources	Homework and laboratory reports
Use the scientific method to conduct laboratory experiments, using various forms of technology	Hands-on laboratory activities and laboratory reports

Grading System

Letter Grade	Percentage Range
A	90 to 100 percent
B Plus (B+)	87 to 89.9 percent
B	80 to 86.9 percent
C Plus (C+)	77 to 79.9 percent
C	70 to 76.9 percent
D	60 to 69.9 percent
F	Below 60 percent

Statement and Policy on Cheating, Plagiarism, and Academic Conduct
Academic Conduct Policy (Policy 304) [PDF]

Students are required to perform all the work specified by the instructor and are responsible for the content and integrity of all academic work submitted. A violation of

academic integrity will occur if a student: (1) knowingly represents work of others as one's own, (2) uses or obtains unauthorized assistance in any academic work, (3) gives fraudulent assistance to another student, or (4) furnishes false information or other misuse of college documents.

Unauthorized use of Artificial Intelligence (AI) is prohibited unless the instructor explicitly permits it in the syllabus or assignments. If tools such as ChatGPT are permitted by an instructor to be used for an assignment, they should be used with caution and with proper citation. In all such cases, you may only use the specific tools identified as acceptable and you must adhere to the College's standards for attribution, validation, and transparency.

In cases of suspected violation of academic integrity, the incident is to be reported to the Office of Academics. A student found guilty of violating the rule of academic integrity by the Vice President of Academics will be considered to have failed in personal obligation to the College; such failure will be subject to disciplinary action by the College. Unless otherwise notified, the instructor will allow students who are pending disciplinary action to attend class.

Citation Styles and Formatting

Work submitted for any Warren County Community College course must conform to the required formatting and citation style that are specified by the instructor. The Library and Instructional Support Center can assist students with formatting and citations for assignments and papers.

WCCC Attendance Expectations

The College expects students to attend and participate in all classes. This involves sharing discussions and lectures in class, as well as interacting with other students. Grades are based on the quality of work students complete in meeting the requirements for a particular course, as stated in the course syllabus and catalog description. Attendance, among other factors, may be an additional criterion for assigning grades. Students should realize that they are responsible for all class meetings and that work

missed because of absences may affect their grades. Attendance in online classes is determined by the completion of assignments/ tests. Students who have not completed any assignments or tests will be considered non-attending and receive an NF grade in online classes.

Class Attendance Expectations

Topical Outline

- Newton's First Law of Motion
- Linear motion. Newton's Second Law of Motion
- Newton's Third Law of Motion
- Momentum
- Rotational motion, gravity, projectile and satellite motion
- The atomic nature of matter
- Solids, liquids, and gases. gases and plasmas
- Changes of phase. Temperature, heat, and expansion
- Heat transfer and thermodynamics
- Thermodynamics
- Describing motion: Kinematics in one dimension
- Kinematics in two dimensions. Vector analysis
- Linear momentum and rotational motion
- Fluids and fluid dynamics
